# Donor Care Units (DCUs)

### DCUs are Not New

- Mid-America Transplant in St. Louis, MO: Established 2001
- Different Models Nationwide:
  - OPO Operated
  - Hospital Based

## Establishment of DCUs Recommended

- 2022 <u>NASEM Report</u> recommends establishment of DCUs to:
  - Better serve donor families
  - Increase cost-effectiveness
  - Foster innovation in organ rehabilitation and donor intervention research

## Staffing

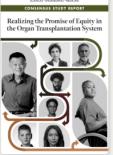

- Dedicated beds for donors in a dedicated space
- Operating room space with trained staff, specifically for organ procurement surgery
  - Beside care by hospital staff
  - Donor management staffed by OPO

#### Improving Outcomes

#### Studies\* have shown that Organ Recovery Centers:

- Reduce the time spent between organ recovery and transplantation;
- Improve outcomes for transplant recipients;
- Increase the average number of organs recovered from each donor;
- Reduce the overall costs associated with organ recovery;
- Reduce donor operating room delays at the originating hospital; and
- Reduce errors and increase quality in the organ recovery process.

## **OVERVIEW**

## Where will these DCUs be?

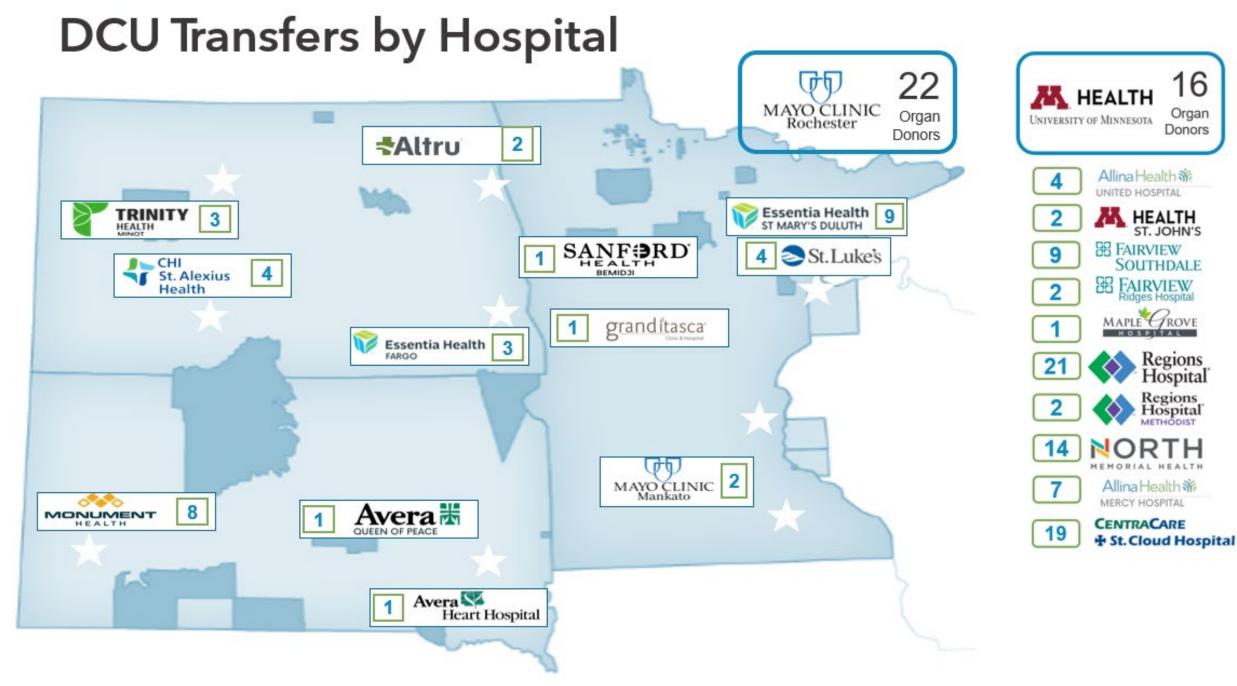

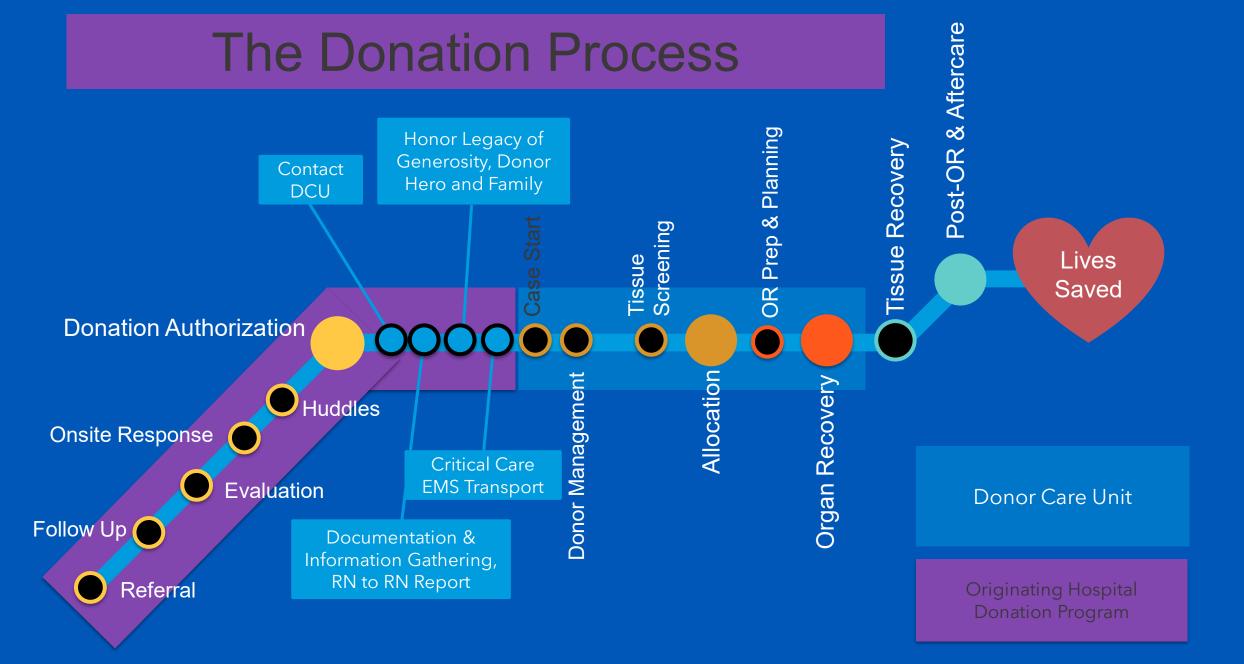

#### What will the process look like?

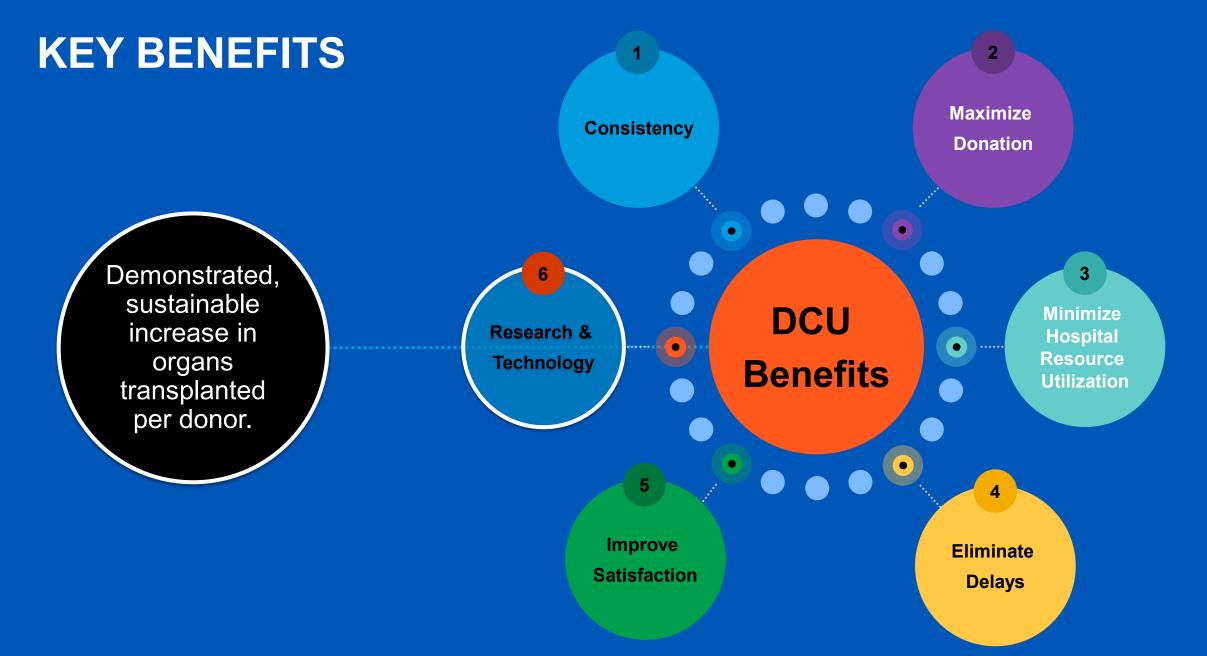

- Donation process starts at hospital of origin:
  - Referral to LifeSource, brain death declaration, family care, honor walks and other key tenets of Hospital Donation Program.
- Donation completed at DCU:
  - Donor optimization, coordination, allocation process (based on original hospital location) and organ procurement will occur at the DCU.

### When will the transfer of donors to DCUs begin?

September 2023
